

## **Facilities Usage Policy Recommendation**

Prior to entering, a liability release waiver should be signed by parents of any athlete using the facility.

The Gentry Youth Organization is a community wide organization that is widely accepted by the Gentry population. Therefore I think they should have some acceptable uses that other organizations don't get. GYO teams should be allowed to use the facility that fits their sport. For example, baseball, softball, and football are outside sports so they should be allowed to use outside facilities. Basketball and wrestling are indoor sports so they may use the gyms/PAC.

Organizations such as travel teams or clubs should be allowed to use the facilities as long as their coach is a registered volunteer or employed coach for the school district. These teams shall have a minimum of 50% Gentry students.

--School teams come first. No other organization's teams will push a school team out of a facility. If a school coach decides to run late on practice or change their practice schedule the outside team will be left to adjust.

--Outside teams that practice after a school team should not enter the facility until the high school team is completely finished and leaving the facility.

--No siblings of athletes should be allowed in the facility during practice.
